Pune, Maharashtra, India | +91 8999153835 | gabhaleshashank@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

D. Y. Patil College of Engineering, Akurdi
B. E. – Computer Engineering

NOV 2022 – Present
Pune, Maharashtra

EXPERIENCE / INTERNSHIP

Intern at AICTE – EduSkills

JAN 2025 – MAR 2025

Role – AWS Cloud Architect

Remote

- Deployed and secured a PHP–MySQL web application on AWS using EC2, RDS, VPC, and Secrets Manager.
- Configured Load Balancer and Auto Scaling to ensure reliable and scalable application performance.
- Strengthened application security while working closely with the team to resolve deployment challenges.

Intern at AICTE – EduSkills

OCT 2024 – DEC 2024

Role – RapidMiner Data Scientist

Remote

- Developed data pipelines to clean, transform, and prepare datasets for analysis.
- Applied feature engineering techniques to enhance data quality and improve workflow efficiency.
- Worked with RapidMiner to design automated processes, gaining practical exposure to real-world data engineering.

TECHNICAL SKILLS

Programming & Scripting: Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: React.js, Node.js, Express.js, TensorFlow, Flask, Pandas, NumPy, Matplotlib, Scikit-learn

Databases: MySQL, MongoDB

Cloud & DevOps: AWS (EC2, RDS, VPC, IAM, Security Groups, ALB, Auto Scaling), Docker, Kubernetes, Git, GitHub

Data Science & ML: Classification, Regression, Clustering, Time Series Forecasting, Feature Engineering, and API Integration

Analytics & Visualization: Power BI, Jupyter Notebook, RapidMiner Studio

PROJECTS

Seed Quality Detection using Enhanced YOLOv8

AUG 2025 – Present (Ongoing)

Tech Stack: Python, PyTorch/Tensorflow, OpenCV, YOLOv8

- Currently training and optimizing YOLOv8 model for seed grading.
- Working on improving classification accuracy and real-time detection using TensorFlow and OpenCV.

Expense Manager | [Repo](#)

MAY 2024 – OCT 2024

Tech Stack: HTML5, Tailwind CSS, JavaScript, Node JS, Express JS, MongoDB, Axios

- Developed full-stack CRUD web app using Node.js, Express, and MongoDB for expense tracking.

Image Search using Unsplash API | [Live](#)

JUN 2023 – SEP 2023

Tech Stack: HTML5, CSS3, JavaScript (Vanilla), Unsplash API

- Integrated the Unsplash API to build a responsive image search web app.
- Implemented asynchronous API requests and dynamic image rendering.
- Showcased modern frontend skills and clean UI design.
